Select All | Unselect All

Nickname
The name helps you remember each exam share link that you create. *

2 Test

Password
This password must be used with the link to gain access to the selected exams. *

3

Strong

Expiration Date
Password and link will expire on this date. *

4 m-dd-yyyy 1 Week 1 Month 3 Months

5 ☒ Permission to Download Images

6 ☒ Yes, I understand that sharing this link and password will allow all recipients to access my personal Protected Health Information (PHI) within the selected exams.

GENERATE LINK CLEAR

5. Permission to Download Images

Indicate if you want to allow the shared images to be downloaded or if the images are for view only. This defaults to allowing permission to download, you must unselect if you do not want to allow download.

6. Acknowledgement

You must acknowledge that you are sharing Protected Health Information and understand the associated disclaimer by checking the box that states: "Yes I understand that I am downloading Protected Health Information (PHI)"

Once you have filled in the required fields and options, click the "Generate Link" →

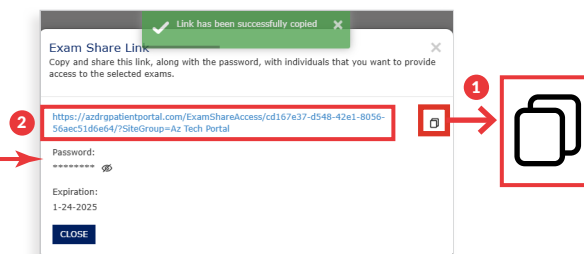

GENERATE LINK

COPYING LINK

Option 1: Select the **copy icon** to the right of the link

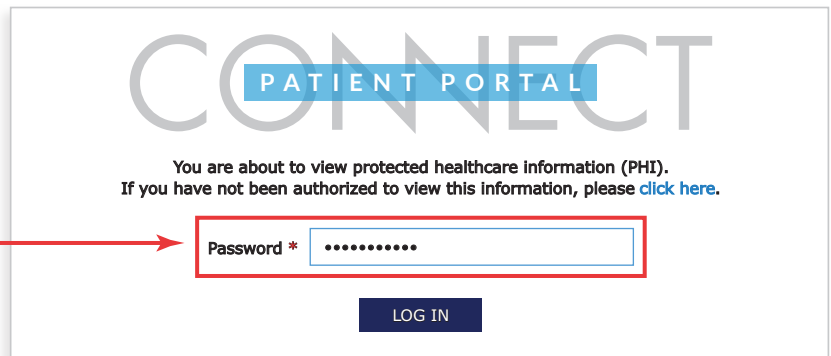

Option 2: Right click the **blue link** and select copy

Note: You must **provide the password** to whomever you are sharing the link with, as it will not be included with the link you copy.

ACCESSING SHARED IMAGES

When the recipient clicks on the link that was shared, they will be prompted to **enter the password** associated with the link.

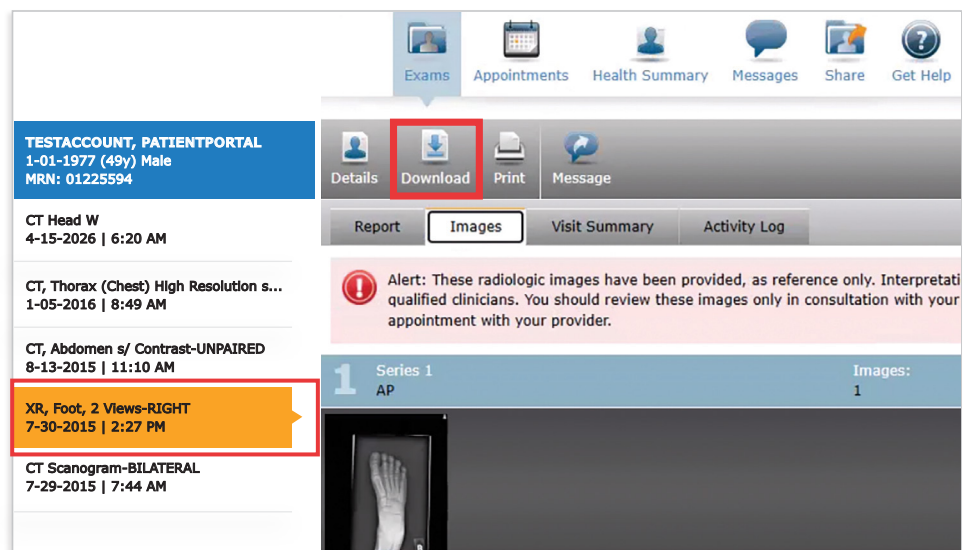

The image shows the 'CONNECT PATIENT PORTAL' login interface. At the top, the word 'CONNECT' is in large grey letters, with 'PATIENT PORTAL' in a blue box. Below this is a warning: 'You are about to view protected healthcare information (PHI). If you have not been authorized to view this information, please [click here](#).' A red arrow points from the text 'enter the password' to a password input field labeled 'Password *' with a red border. Below the field is a 'LOG IN' button.

RECIPIENT'S VIEW

Once the password is successfully entered, the user will see a similar view as you, but **restricted to viewing only the study or studies shared**.

If you enabled image download, the recipient will be able to see and use the download button, which is enabled when a study is selected from the left column. Download experiences for this user will be the same as the patient's experience.

The image shows the recipient's view of the patient portal. On the left is a list of studies. The study 'XR, Foot, 2 Views-RIGHT' dated '7-30-2015 | 2:27 PM' is highlighted with an orange box. On the right, the 'Download' button in the top navigation bar is highlighted with a red box. Below the navigation bar, there is a red alert box stating: 'Alert: These radiologic images have been provided, as reference only. Interpretation by qualified clinicians. You should review these images only in consultation with your appointment with your provider.' At the bottom, a thumbnail of a foot X-ray is visible.

MINORS

- Minors are unable to create accounts in the patient portal. If an appointment needs to be scheduled, it can only be done as a guest.
- If records are needed, they will need to be accessed via the I-Code that should be given to them at the time of the exam. I-Codes are exam (or visit) specific. Depending on how the exams are scheduled, there could be one I-Code for the visit or multiple (e.g. MR T & L Spine on same DOS could have one I-Code or two). If a patient has multiple DOS, they will need to utilize each of their I-Codes for the individual study.
- The I-Code does NOT grant access to all their records, ONLY that one study/visit. I-Codes expire after 90 days. After that time, a patient can submit a Get Help request to re-activate it for another 90 days.
- Once a Minor's account is accessed, patients can share or download images as well.
